Unit 1a Eastside Industrial Estate, Jackson Street,
St Helens, Merseyside, WA9 3AS
Company Reg No 05439759

Continuous Trading
25 Years
Quality Workmanship

During our 25 years in business we have proven ourselves to be one of the most respectable home improvement companies in the North West with a reputation for excellent customer service and after sales care. Most local borough councils have endorsed us as a trustworthy and reliable company and recommend us to their constituents in their handbooks.

We are constantly looking for new ways to improve our service and always welcome any feedback from our customers. Thank you for choosing St Helens Windows to quote for the attached works.

ST HELENS WINDOWS – HIGH SECURITY SYSTEM!

The UPVC frame construction is made from our PREMIUM PROFILE system; this system has been used over the last 32 years in this country, not to mention in countries around the world with very hot climates. This system has gained the reputation of being one of the market leaders and is at the forefront of Technical Improvement in quality, design and security.

Our system is used for both windows and conservatories and is designed to cope with the extreme temperatures experienced in summertime and the cold temperatures throughout the winter. Our system has a well-deserved reputation that you can have faith in.

WE ARE A FENSA REGISTERED COMPANY.

FENSA stands for the Fenestration Self-Assessment Scheme. It has been set up by the Glass and Glazing Federation (GGF), at the request of the **Office of the Deputy Prime Minister** in response to the **current Building Regulations for England and Wales.**

All replacement glazing in homes comes within the scope of the Building Regulations and anyone who installs replacement windows or doors has to comply with current thermal performance standards.

When the time comes to sell your property, your purchaser's solicitors will ask for evidence that any replacement glazing installed since April 2002 complies with the Building Regulations. You will need to provide a certificate showing that the work has been done by an installer who is registered with FENSA.

All of our work is individually fabricated and is made to your requirements to give you optimum satisfaction today and well into the future.

All our windows are fully compliant with the Document 'L' law

UPVC

Here at St Helens Windows we manufacture our own Vogue Window Systems, specially designed and enhanced for appeal and more importantly security. All our systems are reinforced with galvanised steel, regardless of colour and still giving an energy rating of A surpassing what other manufacturers cannot achieve.

Our Vogue system gives an aesthetically enhanced “grand design” appeal, to be the envy of all your neighbours. Setting us apart from the mundane run of the mill, other window systems on the market. The profile provides a seamless fully sculpted finish that matches the whole profile and provides consistent sightlines on all window types.

Smaller energy bills

Replacing all single-glazed windows with A-rated double glazing can save you money on your energy bills.

A smaller carbon footprint

By using less fuel, you’ll generate less of the carbon dioxide that leads to global warming - typically, 680kg a year.

A more comfortable home

Energy-efficient glazing reduces heat loss through windows and means fewer draughts and cold spots.

Peace and quiet

As well as keeping the heat in, energy efficient windows insulate your home against outside noise.

Reduced condensation

Energy-efficient glazing reduces condensation build-up on the inside of windows.

FRAMES

- All our frames are made from fully sculptured 70mm A Rated Profile.
- All frames are re-enforced with steel to our own specification and all joints fully welded.
- All opening windows will be fitted with security locking point and shoot bolts and anti-lever devices, which have been Rigorously Tested and acclaimed to be the best on the market. Our choice of such chosen products is to maintain our leading edge on security. Making our products and installations robustly secure
- All opening windows have lockable push button handles and are lockable in a night vent position
- All doors will have a high security locking system consisting of *multi* locking points, including claw hooks, dead locks and roller cams and Shoot Bolts
- All frames are draught proofed with long lasting Neoprene seals
- Brightest white UPVC on the market with lifetime discoloration guarantee

ALUMINIUM

We've made a massive investment into state of the art machinery, giving you precision cut aluminium products. Our in-house production means we have full control of your bespoke order. We have created a new Dual thermal system profile which boasts the utmost energy efficiency, innovative locking systems and durability of the highest standard. All whilst still offering you, a not to be beaten price for quality.

Our Slide & Glide door system is highly versatile and configurable giving you maximum control over the style and operation of the doors. Multiple panels can be added with open in or open out bi-fold door options to accommodate the design specifications of the building. Unique, flush line pop-out handles allow for square stacking panels when the folding doors are in the open position so that the space is not obstructed any more than is necessary and four solid stainless steel wheels will ensure years of faultless operation.

Form and functionality have been balanced in the design of these folding doors and they can be finished in a range of anodised or polythene powder coat dual aspect colours that can complement many external styles. Our Slide & Glide folding aluminium doors are highly secure and have been certified under the 'Secured by Design' scheme to give peace of mind.

DESIGN FEATURES

- A modern "Grand Design" slimline minimal look
- Four stainless steel wheels ensures smooth and consistent operation
- Unique, flush line pop-out handle that allows maximum door opening and square stacking panels
- Certified under 'Secured by Design' scheme

- 10x stronger than UPVC, especially on door at point of entry
- High security hinges and locking mechanisms as standard
- Shootbolts top and bottom of the interlocks for enhanced security
- Unique high strength roller design for increased weight capacity
- Dedicated Bottom bogey guide for consistent operation and increased security
- Double Track threshold allowing greater stability
- More robust & more rigid over a wider spanning area
- Door U Value 1.7 w/m² K

GLAZING

Solar and energy control. UV fade protection. Noise reduction. Security against storms and break-ins. These are some of the ways St Helens Windows Glass products enhance window performance.

We exclusively use ClimaGuard as our preferred glass in our windows – this glass has a lower “U” value and solar gain than any other type of glass on the market to ensure your windows comply with both current and future glazing regulations. Unlike some common alternatives will not comply with new regulations and also have a tint effect in the glass whereas our ClimaGuard is perfectly clear.

- All our double-glazing is manufactured to British Standards BS 5713 and carries the appropriate kite mark.
- All our units are 28mm for maximum sound and heat insulation for our window system.
- Argon Filled ClimaGuard A units as standard to lower U Value to 1.1
- Toughened safety glass is used where necessary

GLASS DESIGN

Decorative glass has been used through the ages to imbue windows and doors with beauty, style and elegance. This ancient yet timeless craft has the ability to add character and charm to PVC windows and doors.

Design Options

Get creative and discover the design style that reflects your personality. Ranging from traditional motifs for a timeless appeal or contemporary bevelled glass for that modern look with our stunning range you will be spoilt for choice.

Coloured Top lights

Inspired by nature, our beautiful top lights can be used to great effect to enhance your conservatory or windows. Choose from an attractive array of floral or traditional motifs to imbue your windows with a subtle, yet striking refinement.

Bevelled Designs

Our stunning range of intricately faceted bevel designs offer the ultimate in light reflecting brilliance. Traditional and elegant motifs are encapsulated in lead work to create an alluring ambience in your conservatory, sitting room or hallway.

Where ever you choose to enjoy these ornate bevels, your home will shimmer and sparkle with the reflected sunlight from their multifaceted surfaces.

Depending on your needs or the building, different products from St Helens Windows can be selected for optimum window performance, helping keep interiors warmer and saving you money in the process.

STILL UNDECIDED?

Here are a few reasons why you should choose St Helens Windows

- We have over 100 years of experience in home improvements
- We have traded continuously for over 25 years as St Helens Windows
- We have been a FENSA registered company since 2002
- We are the only officially registered installer of The Vogue Window System
- We use Britain's most exclusive and desired system on the market. The window profile system has been specifically designed and licensed to St Helens Windows criteria and has been a long process of 10 years where we now produce the complete window system in our dedicated factory in Jackson Street where our full attention and focus is fabricating the best window system you could wish for.
- We exclusively use ClimaGuard as our preferred glass in our windows – this glass has a lower U value than any other type of glass on the market to ensure your windows comply with both current and future glazing regulations. Unlike some common alternatives will not comply with new regulations and also have a tint effect in the glass whereas our ClimaGuard is perfectly clear.
- All products sold by St Helens Windows are manufactured by our own qualified fabricators at our factory at Unit 1 East Side, Jackson Street, St Helens
- Our locking systems are approved by The Police Secured by Design – recommended by the Official Police Security Initiative.
- Our products are reinforced (frames and door panels) for extra security and peace of mind and our UPVC profile has never had any problems with discoloration.
- We are a family owned company that gives you the personal touch that you need
- We have a dedicated after sales service Department that responds within 24 hours
- All conservatories have a dedicated project manager to advise and inform you on the progress of your job at each step until your dream conservatory becomes a reality
- All work carried out is done by our own highly qualified craftsman – We do not use sub-contractors to carry out jobs
- A full, no-quibble 10 year guarantee which starts from the day of completion of your installation. Plus an insurance backed guarantee is given to you included in the price.
- One of the fastest growing double glazing company's in the north west with 80% of the company's turnover being earned through recommendations

Our quality products at affordable prices means you get more value for your money in today's competitive market which gives you the confidence and total peace of mind to choose St Helens Windows to carry out your home improvements.

ACCREDITATIONS

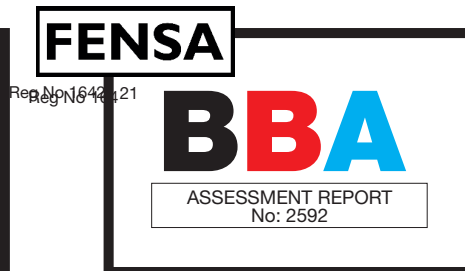

Our accreditations come from 25 years of dedication and professional craftsmanship

Reg No 3818

BBA - Assessment report no.2643
Assessment of outward opening and tilt/turn PVC-U windows system.

BBA - Assessment report no.2592
